## WELCOME LETTER

### Princess Yasmin Aga Khan President, Alzheimer's Disease International

Dear friends,

I am honoured to welcome you all to Alzheimer's Disease International's 37th global conference, tackling the central theme of "Solutions for today and tomorrow."

This conference will offer an incredible opportunity to examine how far we have come in dementia research, treatment, care, and innovation – and how far we still have to go. As always, ADI is dedicated to centring the voices of people living with dementia and their carers, whose experiences are at the heart of our mission. I am proud that this conference continues to bring together people from around the world, united by a common cause: improving the lives of those affected by this condition and ensuring they have access to the treatment, care, and support they deserve.

It is an honour to have Her Majesty Queen Sofía of Spain and Her Royal Highness Princess Muna Al Hussein of Jordan attend the conference once again this year, this time in the beautiful French city of Lyon. The voices of our ambassadors do so much to amplify our cause.

ADI owes so much to its member associations around the globe and everyone working tirelessly to bring more awareness to the issues at stake around dementia. The number of people diagnosed with the condition is expected to skyrocket in the coming years, and things will only change if we face these challenges together.

My best wishes for a thought-provoking and engaging conference.

**Princess Yasmin Aga Khan**  
**President, Alzheimer's Disease International**

## WELCOME LETTER

---

### Her Majesty, Queen Silvia of Sweden ADI Ambassador

---

Ladies and gentlemen,

Thank you for being part of the Alzheimer's Disease International global conference!

My engagement in this cause is both personal and grounded in a broader commitment to improving the lives of people affected by Alzheimer's disease. Having seen the impact of dementia in my own family – in both my mother and my brother – I know how valuable your work truly is.

This biennial conference, the longest-running international forum on dementia, brings together expertise and experience from all over the world. With an estimated 55 million people living with this life-changing disease, your efforts to advance care, research, and understanding, while challenging stigma, are more important than ever.

Although I regret not being able to join you in person, you know that you have my full support. Thank you for your dedication and tireless commitment. Together, we are building a more hopeful future for people with Alzheimer's disease and their loved ones.

Thank you!

**Her Majesty, Queen Silvia of Sweden**

## WELCOME LETTER

### Her Royal Highness, Princess Muna Al Hussein of Jordan ADI Ambassador

Dear friends,

As one of Alzheimer's Disease International's longstanding Global Ambassadors, it is my pleasure to welcome you to ADI's 37th global conference here in Lyon, France, on behalf of ADI and its French member association, France Alzheimer & Maladies Apparentées.

This conference always represents an incredible opportunity to learn from one another. This year, an unprecedented number of delegates are traveling from far and wide to come here, all united by the same belief and the same dedication to research, care, and advocacy for people living with dementia and their carers.

Over the next three days, I hope you take full advantage of everything the conference has to offer – from the symposia, plenaries, parallel sessions, and hundreds of posters delving into the multifaceted challenges and developments in the fields of dementia innovation, research, care, treatment, and support; to the book and film presentations offering diverse perspectives on the condition.

Beyond that, I hope you will leave this conference having forged new bonds with one another. The connections we forge in person are an important reminder that together, we can do so much. We must never forget that we are all part of an incredible community, each tackling the challenges of dementia in our own ways, and our compounded efforts have a far-reaching effect. The bridges we build today can become the key to unlocking new discoveries and innovations tomorrow that can – and will – make a real difference in the world.

With my warmest regards,

**Her Royal Highness, Princess Muna Al Hussein of Jordan**

## WELCOME FROM ALZHEIMER'S DISEASE INTERNATIONAL

### Paola Barbarino, CEO, Alzheimer's Disease International

Welcome to the beautiful city of Lyon and to the 2026 ADI global conference. I hope you will enjoy our wonderful speakers and find some time to sample the heritage and gastronomical delights Lyon has to offer.

As ever, I hope that our biennial get-together will leave you with a clearer idea of what is happening in our field right now, what is important to our cause, and what we all need to work on in the next two years.

Advocacy for dementia and Alzheimer's has never been more important, and our community is the best placed to face the challenges and turn this momentum to our advantage. We see a clear sign of interest from governments all over the world in dementia and Alzheimer's, as the number of cases becomes too important for it to be ignored any longer. Advances in treatment and diagnosis are playing in our favour; there is an appetite for more information and more knowledge. Dementia is slowly becoming the leading cause of death in many high-income countries, and there are all signs that this sad trend is set to increase all over the world. Evidence that risk-reduction strategies may benefit future generations is beginning to capture the interest of governments. Our recent successes in getting dementia recognised as a major non-communicable disease have played into this trend.

However, the challenges of social care, felt across our community right now, are ever-present, and not much is being done to address the pressures families face worldwide.

Devising and testing strategies to be louder and better advocates is why our community

gathers every two years. Meeting so many voices from all over the globe in the same situations as you will validate and strengthen your arguments. The power to change the world is in your hands. Use it, grow your confidence and authority, and most of all, enjoy this celebration of our impactful community and of all its hard work!

### Meera Pattabiraman, Chair, Alzheimer's Disease International

We are delighted to welcome you to this year's ADI conference, hosted in partnership with our longstanding member association, France Alzheimer, here in Lyon.

This year's theme – solutions for today and tomorrow – reflects the critical crossroads at which we stand in the global response to dementia. The scientific and policy progress achieved in recent years is undeniable. New research advances, growing public awareness, and stronger national strategies are reshaping the landscape. Yet progress must translate into meaningful change. It is essential that governments, advocates, researchers, and care providers build on this momentum so that people living with dementia and their carers experience tangible improvements in their daily lives.

Over the next three days, you will hear from leading voices across our field as they explore dementia through the lenses of public health policy, awareness, diagnosis, treatment, care and support, research and innovation, risk reduction, and support for carers. This conference is not only a platform for knowledge-sharing, but also a space for collaboration, reflection, and renewed commitment.

I hope you leave Lyon feeling inspired, energised, and strengthened in your resolve.

The challenges before us are significant, but so too is our collective capacity to address them. Together, through shared expertise, partnership, and determination, we can

deliver solutions that make a difference today and shape a better tomorrow.

Welcome to Lyon, and I wish you a productive and rewarding conference.

## WELCOME FROM FRANCE ALZHEIMER

### Joël Jaouen, President of France Alzheimer et maladies apparentées

We are delighted to welcome you here in Lyon, for the 37th Conference of Alzheimer's Disease International (ADI), which we have the honour of co-organising and hosting in France.

This gathering is essential – essential because of the number of participants, the diversity of countries represented and above all the quality of the work, exchanges, and commitments that will unfold here. Over the coming days, we will all share knowledge, compare practices, and work together to advance the current momentum surrounding Alzheimer's disease and other types of dementia.

Every day, alongside people living with dementia and their caregivers, we witness the urgency to act. This urgency guides my daily commitment and must guide our dedication to improve diagnosis, strengthen support and care, advance research and bring more support to caregivers. I firmly believe in practical solutions, and I am convinced that they emerge from the convergence of experiences, shared innovation and international cooperation that ADI fosters and drives forward each day.

The strong mobilisation around this event shows our collective determination to make a

difference. It also places upon us a collective responsibility to rise to expectations by turning our ideas into meaningful and lasting action.

I look forward to the meetings ahead, to discussions that may at times be demanding but are always constructive, and to the partnerships that will emerge from this conference.

I would like to warmly thank ADI for its trust, the entire team of our local branch France Alzheimer Rhône and its president, Gérard Herrbach, for their precious support, all the speakers for their commitment, and each and every one of you for your presence and involvement.

I wish you all an excellent conference here in Lyon.

### Benoit Durand, CEO of France Alzheimer et maladies apparentées

What a pleasure to welcome you to France and to Lyon in particular – the capital of Gaul and the heart of French gastronomy. I have no doubt that you will find the time to explore its iconic landmarks and to taste its specialties.

The remarkable programme devised by ADI for its 37th International Conference will, without a doubt, give full expression to our common fight.

The wave of interest reflected in the

registrations for this event is deeply heartwarming. To see so many of you joining us is a source of great joy. It carries us forward, but also reminds us of our responsibility.

Our association, France Alzheimer, will relentlessly continue to advocate for the recognition of the disease as a genuine public health issue. Together with you, we remain committed to destigmatising this disease, raising awareness about risk factors and prevention, and constantly pushing the boundaries of research funding.

I am eager to meet you and to hear the insights that countries from around the world have to share through their experiences and innovations. Only together will we succeed in providing ever-better support for all those living with the disease and their caregivers, in their daily lives. Since solidarity is our driving force, I am convinced that the knowledge shared during these sessions will be the foundation of a brighter future.

My thanks to ADI for choosing France as the host country. Thank you all for being ambassadors for the cause of Alzheimer's and related diseases.

## ABOUT ALZHEIMER'S DISEASE INTERNATIONAL (ADI)

Alzheimer's Disease International (ADI) is the international federation of Alzheimer associations around the world, in official relations with the World Health Organisation (WHO). ADI currently has 105 members, each member being the Alzheimer association in their country that supports people living with dementia and their families. ADI believes that the key to winning the fight against dementia lies in a unique combination of global solutions and local knowledge. As such, it works locally, by empowering Alzheimer associations to promote and offer care and support for people living with dementia and their carers, whilst working globally to focus attention on dementia. There are over 55 million people estimated to be living with dementia around the world and this number is set to reach 139 million by 2050. ADI's vision is prevention, care and inclusion today, and cure tomorrow.

## ABOUT FRANCE ALZHEIMER & MALADIES APPARENTÉES

France Alzheimer was founded by families and health professionals in 1985 and has been a member of ADI since 2020. France Alzheimer is also a member of Alzheimer Europe. The main office is based in Paris, France, with 99 branches across the country.

The association has led to the implementation and development of support for people living with dementia and their caregivers in France. They have a web radio, 'Radio Alzheimer.' Some of the services provided by France Alzheimer include: caregiver meetings, counselling, day care, dementia care training, a helpline, meaningful engagements/activities, memory cafés, newsletters, resources (fact sheets, reading materials), seminars/webinars/workshops, support groups, and training for carers.

## HIGHLIGHTED ADI SESSIONS

**Tuesday 14 April 11:15–12:45 Bellecour 3**

### Beyond the launch: making dementia plans work in the Americas

Across the Americas, important progress has been made in recent years in securing the adoption of national dementia plans, strategies, and related policy frameworks. However, the approval of a plan is only the starting point. The more complex and decisive stage is implementation: translating policy commitments into funded actions, functioning systems, cross-sector coordination, accountability mechanisms, and tangible improvements in the lives of people living with dementia and their families.

This session focuses on what happens after national dementia plans are adopted, exploring the practical, political, and technical challenges involved in implementation, including governance, financing, sustainability, service delivery, workforce capacity, research, monitoring, and long-term accountability. The conversation brings together perspectives from across North and South America, reflecting different country experiences and institutional roles.

#### Chairs:

**Diego Aguilar**, Regional Director for the Americas at Alzheimer's Disease International, Argentina

**Elaine Mateus**, Chair of the Brazilian Federation of Alzheimer Associations, Brazil

#### Speakers:

**Matthew Baumgart**, Vice President of Health Policy at the Alzheimer's Association, USA

**Sofia Cuba**, professor at Cayetano Heredia Peruvian University and Principal investigator in the IMPACT Salud Project, Peru

**Facundo Manes**, neurologist, founder of the Institute of Cognitive Neurology, Argentina

**Mariana López-Ortega**, researcher and policy expert at the National Institute of Geriatrics of the Ministry of Health, Mexico

**Ms Christina Scicluna**, CEO of the Alzheimer Society of Canada, Canada

**Tuesday 14 April 13:00–14:00,  
Salon Gratte Ciel**

### Industry session ADI roundtable – the semantics, ethics, and implications of the diagnostics revolution: earlier and more accurate diagnosis and extended period of condition management

Following ADI's End of Year Forecast event (December 2025) and follow on webinar (February 2026), which focused on the diagnostics revolution, this timely roundtable will bring together key opinion leaders to discuss and debate the semantics, ethics, and implications of much earlier and accurate diagnosis, facilitated by diagnostics breakthroughs, with a view to improved communication and clarity globally. What does it mean for the diagnosis pathway, expanding to include an 'at-risk' population, and those in the pre-clinical and pre-symptomatic stages? How could it impact the accuracy and staging of symptomatic diagnosis? What impact does it have on clinical trial recruitment? What does it mean in terms of the language we adopt and what constitutes a diagnosis? What are the emerging information and education gaps, and how will health and care systems need to adapt to a greatly extended period of condition management, similar to other chronic diseases? What implications for legal, financial and employment rights and what support system adaptations are needed? Finally, how will this be interpreted by the media and, most importantly, by people receiving a diagnosis or being identified as 'at risk'?

#### Chair:

**Paola Barbarino**, CEO, Alzheimer's Disease International, UK

#### Speakers:

**Elisabetta Vaudano**, Innovative Health Initiative, Belgium

**Andrea Pfeifer**, AC Immune SA, Switzerland

**Miia Kivipelto**, Karolinska Institutet, Sweden

**Carolyn Paul**, Edelman, United Kingdom

**Laurie Waters**, Global Dementia Expert Panel, Alzheimer's Disease International, USA

**Rhoda Au**, Boston University, USA

**Wednesday 15 April 15:30–17:00,  
Bellecour 3**

**How applied dementia education transforms care today and shapes the future**

As dementia prevalence rises globally, the demand for education that delivers immediate improvements in care while strengthening future systems has never been greater. Traditional knowledge-heavy training often fails to translate into daily practice. This session explores how applied, practice-focused dementia education offers a powerful solution improving care quality today while building a competent, adaptable workforce for tomorrow.

Drawing on international experience across clinical, community, and education settings, the panel highlights what works, why it works, and how it can be scaled across cultures and care systems.

**Chair:**

Dawn Brooker, Professor Emeritus and University Fellow, Association for Dementia Studies, University of Worcester

**Speakers:**

**David Troxel**, Best Friends Approach, USA

**Sue Moroney**, Silverado, Australia

**Alison Canty**, University of Tasmania, Australia

**Bill Yeates**, ADI board, Australia

**Mary Flynn**, ADI Accreditation, UK

**Milly Wai I Ng**, Kiang Wu Nursing College of Macau, Macau

**DY Suharya**, ADI Asia Pacific regional director, Indonesia

**Amalia Fonk-Utomo**, ADI head of accreditation, The Netherlands

## DETAILED PROGRAMME: TUESDAY 14 APRIL

**185: Strengthening dementia awareness in the Francophone world: collaborative actions of ADI member associations**

- Ms Marie Christine Le Bourdais, Alzheimer's Society of Montreal (*Canada*)

**311: MedFriend Routing Service: a nonprofit initiative supporting people with dementia and fostering community development in Russia**

- Ms Ksenia Safronova, Nodementia.net (*Russian Federation*)

**640: Building dementia awareness through multi-sector engagement in St. Vincent and the Grenadines**

- Dr Glenna Brewster, St. Vincent and the Grenadines Alzheimer's Disease and Dementia Association (*USA*)

**111: Innovative approaches to learning**

- Ms Caroline Bartle, Alzheimer's New Zealand (*New Zealand*)

**1031: Co-production and Involvement Approaches across the Eight UK Dementia Networks: Shared Insights, Challenges, and Lessons Learned**

- Dr Clare Hammerton, SPIN-D Dementia Network (*UK*)

11:00	12:30	<p><b>Lived experience, the heart of affecting change</b>  <b>Chair:</b> Mr Yue-En Chong TEP, Managing Director, Bethel Chambers LLC (<i>Singapore</i>)</p>	Bellecour 2
-------	-------	---	-------------

**664: Dementia lived experience panels: the work of the Global Brain Health Institute (Trinity College Dublin)**

- Prof. Sherril Gelmon, OHSU-PSU School of Public Health (*USA*)

**669: ALZ MTY (Mexico) : an integrated education and wellbeing model for dementia care partners for local communities**

- Ms Maria Teresa Villarreal de Dillon, Alzheimer Monterrey (*Mexico*)

**698: Campaigning for change: prioritising women's brain health in dementia policy**

- Ms Thea Laurie, Alzheimer Scotland (*United Kingdom*)

**600: The progress and ambitions of Japan Dementia Working Group (JDWG): those of us living with dementia take part in creating an inclusive society based on the Basic Law**

- Ms Shinobu Yamanaka, Japan Dementia Working Group (*Japan*)

**633: How can books on dementia care really include the perspective of those living with dementia?**

- Prof. Dawn Brooker, University of Worcester (*United Kingdom*)

**291: Shaping dementia policy: how the Norwegian Health Association offered a range of user involvement models**

- Ms Tone Poulsson Torgersen , Norwegian Health Association (*Norway*)

11:00	12:30	<p><b>Beyond the launch: making dementia plans work in the Americas</b>  <b>Chair:</b> Mr Diego Aguilar, Americas Regional Director, Alzheimer's Disease International (<i>Argentina</i>)          Prof Elaine Mateus, President of the Brazilian Federation of Alzheimer's Associations (<i>Brazil</i>)</p>	Bellecour 3
-------	-------	--	-------------

- Dr Mariana López Ortega, National Institute of Geriatrics (*Mexico*)

- Mr Matthew Baumgart, Alzheimer's Association (*USA*)

- Dr Sofia Cuba, Universidad Peruana Cayetano Heredia (*Peru*)

- Dr Facundo Manes, Institute of Cognitive Neurology INECO (*Argentina*)

**DETAILED PROGRAMME: TUESDAY 14 APRIL**

## DETAILED PROGRAMME: TUESDAY 14 APRIL

		632: Towards a global definition of person-centered dementia care • Dr Elizabeth Edgerly, Alzheimer's Association (USA)	
		162: Effectiveness of an intervention program to improve the detection of cognitive impairment in a low- and middle-income country • Prof. Juan Llibre, University of Medical Sciences of Havana (Cuba)	
14:00	15:30	<b>Dementia risk factors: brain health for life</b> <b>Chair:</b> Mr Matthew Baumgart, Vice President of Health Policy, Alzheimer's Association (USA)	<b>Gratte Ciel</b> 1,2,3
		251: Visit-to-visit fasting blood glucose variability as a blood-based biomarker for Alzheimer's Disease risk: evidence from a large population-based cohort • Mr Linbo Xie, Tsinghua University (China)	
		542: Population attributable fractions of modifiable risk factors for dementia: a nationwide study from the Netherlands • Dr Kay Deckers, Maastricht University / Alzheimer Centrum Limburg (Netherlands)	
		741: Prevalence of dementia risk factors and suspected dementia among older adults in the Maldives • Ms Mariyam Fiyaza, Alzheimer's Society of Maldives (ASM) (Maldives)	
		1020: Effect of Obicetrapib, a potent cholesteryl ester transfer protein inhibitor, on P-tau217 levels in patients with cardiovascular disease • Prof. Philip Scheltens, EQT Life Sciences (Netherlands)	
		819: Emerging modifiable risk factors for dementia prevention: beyond the Lancet Commission 14 • Dr Claire Burley, Curtin University (Australia)	
		455: A feasible cost-saving model for a national dementia prevention program • Prof. Henry Brodaty, University of New South Wales (Australia)	
14:00	15:30	<b>AI and technology: revolution or threat?</b> <b>Chair:</b> Prof. Yun-Hee Jeon, Susan and Isaac Wakil Professor of Healthy Ageing, The University of Sydney School of Nursing and Midwifery (Australia)	<b>Salon Gratte Ciel</b> 
		202: The role of technology in enhancing cognitive engagement among older adults with cognitive impairment • Prof. Sara Czaja, Weill Cornell College of Medicine (USA)	
		680: Using virtual reality and artificial intelligence to promote multi-sensory reminiscence experiences for people with dementia and caregivers • Dr Winnie Sun, Associate Professor, Faculty of Health Sciences, Ontario Tech University (Canada)	
		158: MinderCare: a digital safety net for people living with dementia at home. • Ms Jo James, Imperial College Healthcare NHS Trust (United Kingdom)	
		68: Uncovering the impact of specific competing caregiving needs on caregiving rewards: comparing machine learning and traditional statistics using secondary data • Ms Yun Chen Kuo, Chang Gung University (Chinese Taipei)	
		752: User-centered design and development of a mobile-based intervention for dementia family care partners • Ms Annabelle Greenfield, University of Southern California (USA)	

## DETAILED PROGRAMME: TUESDAY 14 APRIL

		<p>484: An exploratory study of family caregivers perceptions and adoption of AI chatbots for dementia care in Singapore</p> <ul style="list-style-type: none"> <li>Ms Melissa Chan, Global Brain Health Institute (<i>Singapore</i>)</li> </ul>	
14:00	15:30	<p><b>A rights-based approach to national dementia plans and policy</b></p> <p><b>Chair:</b> Dame Louise Robinson, Regius Professor of Ageing, Newcastle University (United Kingdom)</p>	<b>Bellecour 1</b>
		<p>1022: Generating impact in public policy: lessons from the IMPACT Salud project on community and policy engagement in Peru</p> <ul style="list-style-type: none"> <li>Ms Kelly Milagros Tello Lizarraga, Universidad Peruana Cayetano Heredia (<i>Peru</i>)</li> </ul>	
		<p>532: From neglect to action: the French national strategy 2025–2030 for Alzheimer's and neurodegenerative diseases</p> <ul style="list-style-type: none"> <li>Ms Lorène Gilly, France Alzheimer et maladies apparentées (<i>France</i>)</li> </ul>	
		<p>876: The national dementia strategy in Germany: progress, lessons, and future directions</p> <ul style="list-style-type: none"> <li>Ms Astrid Lärm, German Centre of Gerontology (<i>Germany</i>)</li> </ul>	
		<p>843: Prioritizing dementia policy in Nigeria: the push and pull factors</p> <ul style="list-style-type: none"> <li>Dr Lazarus Eze, Sub-Saharan Africa Brain Health Initiative (<i>Nigeria</i>)</li> </ul>	
		<p>231: The Spanish Alzheimer's and Dementia Observatory: a collaborative platform driving national policy innovation</p> <ul style="list-style-type: none"> <li>Ms Eva Nebot, Pasqual Maragall Foundation (<i>Spain</i>)</li> </ul>	
		<p>959: Aligning dementia plans with WHO and USI: comparative policy insights and recommendations for Kazakhstan</p> <ul style="list-style-type: none"> <li>Dr Radmila Tsoy, Asfendiyarov Kazakh National Medical University (<i>Kazakhstan</i>)</li> </ul>	
14:00	15:30	<p><b>Socio-cultural care, context, and inclusivity</b></p> <p><b>Chair:</b> Dr Alison Canty, Associate Director, Learning and Teaching, Wicking Dementia Research and Education Centre (Australia)</p>	<b>Bellecour 2</b>
		<p>369: The impact of rural-to-urban migration on grandchild caregivers' cognitive health in China</p> <ul style="list-style-type: none"> <li>Ms Shan Qu, University of Massachusetts Boston (<i>China</i>)</li> </ul>	
		<p>463: Supporting care partners through cultural inclusivity: Bathing care experiences in a group home for people with dementia in Taiwan</p> <ul style="list-style-type: none"> <li>Ms Wei-Rou Shen, Syu-Deng Long-Term Care System (<i>Chinese Taipei</i>)</li> </ul>	
		<p>1063: Socio-cultural care for people with dementia in an African context: the ZARDA model</p> <ul style="list-style-type: none"> <li>Ms Kudzai Mpunzwana, Zimbabwe Alzheimer's and Related Disorders Association (<i>Zimbabwe</i>)</li> </ul>	
		<p>1116: My Story – a communication tool for a multilingual approach to dementia care</p> <ul style="list-style-type: none"> <li>Dr Tatjana Cvetko, ZD Koper (<i>Slovenia</i>)</li> </ul>	
		<p>882: Social care professionals' perspectives on challenges and possibilities in offering support to family caregivers to persons with dementia of non-European background: an interview study</p> <ul style="list-style-type: none"> <li>Dr Marie Tyrrell, Sophiahemmet University (<i>Sweden</i>)</li> </ul>	
		<p>778: Supporting the care partners' journey: global lived experience insights and strategies across the care continuum</p> <ul style="list-style-type: none"> <li>Ms Helen Bundy Medsger, Global Brain Health Institute (<i>USA</i>)</li> </ul>	

## DETAILED PROGRAMME: TUESDAY 14 APRIL

14:00	15:30	<b>Ensemble face à l'Alzheimer: porter une voix francophone forte, inclusive et influente</b> <b>Chair:</b> Mr Kevin Rabiant, Head of Research Department, France Alzheimer et maladies apparentées (France)	<b>Bellecour 3</b>
		<ul style="list-style-type: none"> <li>• Dr Ginette Youatou, ACMA Cameroun (<i>Cameroon</i>)</li> <li>• Dr Abdou Ibrahima Traore, A.C.M.A MALI (<i>Mali</i>)</li> <li>• Ms Sabine Henry, Ligue Nationale Alzheimer Liga (<i>Belgium</i>)</li> <li>• Ms Nyamiye Hermenegilde, Alzheimer Community Support of Burundi (ACSB) (<i>Burundi</i>)</li> <li>• Ms Marie Christine Le Bourdais, Société Alzheimer de Montréal (<i>Canada</i>)</li> <li>• Ms Augustine Ewane, ACMA Cameroun (<i>Cameroon</i>)</li> <li>• Ms Muriel Rason-Andiramaro, Madagascar Alzheimer Masoandro Mody (<i>Madagascar</i>)</li> <li>• Mr Mustapha El Alaoui Faris, Université Mohammed V (<i>Morocco</i>)</li> <li>• Mr Federico Palermi, France Alzheimer Alpes-Maritimes (<i>France</i>)</li> <li>• Dr Louisa Mougoué Ngadeu, ACMA France I</li> <li>• Ms Pascale Dinan, Association Alzheimer &amp; Dementia Mauritius (<i>Mauritius</i>)</li> </ul>	
15:30	16:00	<b>Break / Poster / Networking</b>	<b>Exhibition Hall</b>
16:00	17:00	<b>Plenary - Beyond the plan: the future of dementia policy</b> <b>Chair:</b> Ms Paola Barbarino, CEO, Alzheimer's Disease International (UK)	<b>Amphitheatre</b> 
		<b>1154: Integrating dementia into the global NCD and mental health agenda: the WHO's response to the Global action plan extension</b> <ul style="list-style-type: none"> <li>• Ms Dévora Kestel, Acting Director, Noncommunicable Diseases and Mental Health, World Health Organisation (<i>Switzerland</i>)</li> <li>• Dr July Ester Caballero Peralta, Executive Director of the Directorate of Mental Health, Ministry of Health (<i>Peru</i>)</li> <li>• Mr Shin Nomura, Counselor for Dementia Policy Planning, Ministry of Health, Labour, and Welfare (<i>Japan</i>)</li> <li>• Mr Benjamin Voisin, Head of the Social and Medico-Social Policy Department, Deputy to the Director – Directorate-General for Social Cohesion (<i>France</i>)</li> </ul>

		<b>Member showcase winner announcement</b> <ul style="list-style-type: none"> <li>• Ms Laura Aubert, Head of Membership, Alzheimer’s Disease International (France)</li> </ul>	
		<b>Thank you</b> <ul style="list-style-type: none"> <li>• Mr Benoit Durand, CEO, France Alzheimer (France)</li> </ul>	
		<b>Announcement of 2028 conference</b> <ul style="list-style-type: none"> <li>• ADI 2028 host</li> </ul>	
		<b>Thank you and goodbye</b> <ul style="list-style-type: none"> <li>• Ms Paola Barbarino, CEO, Alzheimer’s Disease International (UK)</li> </ul>	

LIVE SCIENTIFIC PROGRAMME

## ARTS ROOM

**Tuesday 14 April 11:00–11:45**  
**Salon Tête d'Or**

**Movie: Birth**

Birth is a powerful and intimate portrait of the beginnings of France Alzheimer in 1985, the organisation that would go on to transform the landscape of dementia support across France. The film explores how a small group of determined families and advocates came together to break the silence surrounding Alzheimer's disease.

There will be a showing of the film with a presentation by Laurent Dupuis, press relations manager for France Alzheimer et maladies apparentées, and time for discussion.

**Delphine Montaigne**, director

**Tuesday 14 April 14:00–14:45**  
**Salon Tête d'Or**

**Book presentation: Dementia care and provision in the majority world**

Drawing on 10 years of global brain health equity experience from the fellows and faculty of the Global Brain Health Institute, this volume examines dementia epidemiology, diagnosis, and care across lower- and middle-income countries through a novel equity lens, emphasising culturally sensitive and locally tailored approaches. The book explores health disparities, social and economic inequalities, and the importance of prevention and living well with dementia. International in scope, it promotes equitable strategies and will interest researchers, students, and clinicians developing dementia services in lower-and middle-income regions.

There will be a presentation of the book by Prof Iracema Leroi (Site Director) and co-authors from the Global Brain Health Institute at Trinity College Dublin, and time for discussion.

**Iracema Leroi, Kim-Huong Nguyen, Agustín Ibañez, Hany Ibrahim**, authors

**Wednesday 15 April 11:15–12:00**  
**Salon Tête d'Or**

**Book presentation: Coming back to life**

After her 2019 diagnosis of early-onset dementia, Ms Shinobu Yamanaka retired in 2021 after working for 15 years as a sales representative. In October 2022, she opened the community-based day care service 'Day Service Happy' in Konan City, and in 2024 expanded its services to Kochi City, promoting work, dignity, and community. Her story is a powerful testament to resilience, solidarity, and living well with dementia.

There will be a presentation of the book by Mrs Shinobu Yamanaka, member of the Japan Dementia Working Group and the ADI Global Dementia Expert Panel.

**Shinobu Yamanaka**, author

**Wednesday 15 April 15:30–16:00**  
**Salon Tête d'Or**

**Movie: Shifting The Narrative: The Story of Lorenzo's House**

NEXTGEN at Lorenzo's House members will host a screening of the short film Shifting the Narrative: The Story of Lorenzo's House, followed by a discussion led by sons and daughters of younger-onset dementia, alongside Dr. James Mastrianni, a leading neurologist at UChicago Medicine.

This short film shares how one family's journey with younger-onset dementia (YOD) led to a sanctuary of hope and light for families everywhere. Together, sons, daughters, children, and their families navigating this condition are leading a movement – creating spaces for healing, advocating for dementia justice, and building a YOD-informed society.

**Diana Shulla Cose**, director

**Wednesday 15 April 16:30–16:50**  
**Salon Tête d’Or**

**Movie: IRONMINDS – 5 Ironmans to beat Alzheimer’s**

When 78-year-old Mohamed Fadli is diagnosed with Alzheimer’s, he asks his son Hassan for one thing: to act against the disease erasing his memory. Hassan answers with an extraordinary promise: to complete five Ironman triathlons across Europe in one year. Along the way, he meets scientists, individuals living with Alzheimer’s, families, and caregivers. What begins as a son’s challenge becomes a powerful journey through Alzheimer’s in Europe, challenging stigma and urging society and policymakers to reshape the future of care.

There will be a showing of the film trailer with a presentation by Hassan Fadli, project initiator and Ironman competitor, and time for discussion.

**Adrien Rivollier and Hassan Fadli**, directors

**Thursday 16 April 11:00–11:30**  
**Salon Tête d’Or**

**Movie: Some Magic Happens**

There will be a showing of the film *Some Magic Happens*, an excerpt from *Keys Bags Names Words*, a feature documentary that offers a hopeful, wide-ranging look at dementia and brain health, and time for discussion.

In *Some Magic Happens*, Dana Walrath draws on her background as an artist and medical anthropologist to offer a unique perspective while caring for her mother, who lived with her during her experience of Alzheimer’s disease. Walrath exemplifies how we can beautifully connect with our loved ones, even when they don’t know who we are. Instead of desperately trying to pull our loved ones back into our world, her experience shows that it’s okay, and even helpful, to go with them into theirs.

**Cynthia Stone**, director and producer

**Thursday 16 April 14:00–14:45**  
**Salon Tête d’Or**

**Movie: Forget Me Not**

A man grappling with dementia finds solace in vivid memories of his late first wife as the lines between past and present blur. This leaves his current wife heartbroken as she struggles to connect with him in the present and must confront the bittersweet nature of love and loss. *Forget Me Not* explores the enduring power of love and the profound impact of memory on identity and relationships. It sheds light on dementia in the Zimbabwean/African context, challenging misconceptions often tied to madness or witchcraft and encourages viewers to cherish the fragile beauty of life’s fleeting moments.

There will be a showing of the film with a presentation by Ms Kudzai Mpunzwana, chair of ZARDA - Zimbabwe Alzheimer’s and Related Disorders Association, and time for discussion.

**Charlene Furusa**, director

**Makanaka Mavengere**, writer and producer

## POSTER PRESENTATIONS

Poster presentations will take place on the following days and times based on poster number. The full list of poster abstracts is available on page 49 of this programme.

Date	Time	Poster numbers
Tuesday 14 April	Morning coffee break (10:30–11:00)	P101-P159
Tuesday 14 April	Lunch (12:30–14:00)	P197-P234; P456-P493
Tuesday 14 April	Afternoon coffee break (15:30–16:00)	P86–98; P251-P267; P587-P639
Wednesday 15 April	Morning coffee break (10:45–11:15)	P1-P74
Wednesday 15 April	Lunch (12:45–14:15)	P75-P85; P282-P351; P216; P412
Wednesday 15 April	Afternoon coffee break (15:00–15:30)	P166-P196; P237-P250; P352-P401; P40
Thursday 16 April	Morning coffee break (10:30–11:00)	P268-P281; P561-P586; P640-P679
Thursday 16 April	Lunch (12:30–14:00)	P402-P454; P494-P505; P680-P690
Thursday 16 April	Afternoon coffee break (15:30–16:00)	P506-P560

## PLENARY SPEAKERS

### Prof Ricardo F Allegri

**Head of Cognitive Neurology, Neuropsychiatry and Neuropsychology & Director of Memory and Ageing Centre, Fleni Neurological Research Institute, Argentina**

Ricardo Allegri trained in neurology and psychiatry, obtained his PhD in Sciences from the University of Buenos Aires. He undertook a postdoctoral fellowship in cognitive neurology in Saint Etienne, France, and a research stage in behavioural neurology at UCLA, USA.

He began his career as a CONICET (National Committee of Scientifically and Technological Research) scientist in 1995 and chaired the Buenos Aires Government's Health Research Council from 2008 to 2014 and from 2020 to 2023.

He is Head of the Department of Cognitive Neurology, Neuropsychiatry and Neuropsychology as well as Director of the Memory and Ageing Centre at Fleni Neurological Research Institute in Buenos Aires. He is also a Professor of Clinical Neurology at the University of Buenos Aires' School of Medicine.

He is the Principal Investigator for several clinical trials in dementia, including DIAN (Dominantly Inherited Alzheimer's Network), LatAmFINGERS (Latin American Geriatric Intervention Study to Prevent Cognitive Impairment) and iLEADS (International Longitudinal Early-Onset Alzheimer's Disease Study).

He has published extensively on cognitive neurology and dementia in peer-reviewed journals and books and has co-edited nine books. He has received over 52 awards in the fields of cognitive neurology and neuropsychiatry, including the National Academy of Medicine Award in 2006 and the Research Recognition Award from the School of Medicine at the University of Buenos Aires in 2014. He was a Corresponding Fellow of the American Academy of Neurology, a member of the ISTAART Advisory Council and an active member and trustee of the World Dementia Council.

He currently chairs the Scientific Council at the Association Against Alzheimer's Disease and Related Disorders in Argentina (ALMA) and is a member of the Medical Advisory Board at Alzheimer's Disease International.

### Prof Clive Ballard

**Professor of Clinical and Biomedical Sciences, University of Exeter, UK**

Clive is a British, world-leading expert in dementia. He is currently professor of age-related diseases at the University of Exeter and interim deputy pro-vice-chancellor and dean of the University of Exeter Medical School.

Clive specialises in treatment of dementia with Lewy Bodies and Parkinson's disease, the harms of antipsychotic medications in people with dementia, the benefits of non-pharmacological treatments for the management of agitation in people with dementia and the prevention of dementia, including the development of the PROTECT programme of online interventions as a tool for maintaining cognitive health in later life. He has published more than 600 scientific papers and has an H index over 115, with more than 55,000 citations for his work.

### Ms Paola Barbarino

**CEO, Alzheimer's Disease International, UK**

Paola is CEO of Alzheimer's Disease International. Prior to this, she was CEO of LIFE and occupied senior positions with Cass Business School, Tate, British Library and IIED. She is a Board Member of the World Dementia Council, a Trustee of The Postal Museum and of Lauderdale House and a Fellow of the Royal Society of Arts. Previously she was a Non-Executive Director of the Non-Communicable Disease Alliance (NCDA), a Trustee of Shelter, the housing/homelessness charity, and of MLA London. She holds a degree cum laude in Classics from Federico II Napoli University, an MA in Field and Analytical Techniques in Archaeology and an MA in Library and Information Science both from University College London.

## Dr Andrew Budson

### Chief of Cognitive Behavioral Neurology, VA Boston Healthcare System, USA

Educated at Haverford College and Harvard Medical School, Dr. Andrew Budson is Chief of Cognitive Behavioral Neurology at the VA Boston Healthcare System, Associate Director of the Boston University Alzheimer's Disease Research Center, Professor of Neurology at Boston University, and Lecturer in Neurology at Harvard Medical School. In 2008 he was awarded the Geschwind Prize in Behavioral Neurology, and in 2009 the Research Award in Geriatric Neurology, both from the American Academy of Neurology. He has given over 900 talks and published more than 150 papers. He has also written 9 books, including *Memory Loss*, *Alzheimer's Disease and Dementia: A Practical Guide for Clinicians*; *Six Steps to Managing Alzheimer's Disease* and *Dementia: A Guide for Families*; *Seven Steps to Managing Your Aging Memory*; and his latest book for everyone, *Why We Forget and How to Remember Better: The Science Behind Memory*. His books have been or are being translated into Japanese, Chinese, Korean, Spanish, Portuguese, Greek, Arabic, and Lithuanian. His research focuses on using strategies to improve memory in patients with Alzheimer's disease and understanding the relationship between memory, consciousness, and dementia.

## Dr. July Esther Caballero Peralta

### Executive Director of the Directorate of Mental Health, Ministry of Health, Peru

Dr. July Esther Caballero Peralta is a psychiatrist with extensive experience in clinical care, teaching, research, and health system management. She currently works as the Executive Director of the Mental Health Directorate of Peru's Ministry of Health (MINSa) and has a long-standing role at the National Institute of Mental Health Honorio Delgado – Hideyo Noguchi. Dr. Caballero has contributed to the development of national mental health policies, including the Peruvian National Dementia Plan 2026-2028, collaborating with international organizations such as PAHO. She holds a medical degree and specializations in psychiatry and child and adolescent psychiatry from the Universidad Peruana Cayetano Heredia, as well as a Master's degree in Health Care

Delivery Science from Dartmouth College and a certificate in Mental Health Care Leadership from the Harvard T.H. Chan School of Public Health.

## Prof Linda Clare

### Professor of Clinical Psychology of Ageing and Dementia, University of Exeter Medical School, UK

Linda Clare PhD ScD is Professor of Clinical Psychology of Ageing and Dementia at the University of Exeter Medical School. She is Director of the National Institute for Health and Care Research (NIHR) Policy Research Unit in Dementia and Neurodegeneration (DeNPRU Exeter), and dementia theme lead for the NIHR Applied Research Collaboration South-West Peninsula (PenARC). Her research aims to improve the lives of people who are living with dementia and progressive neurological conditions through a focus on promoting well-being, developing rehabilitative approaches to optimise functional ability and independence, and supporting family care. She is particularly known for pioneering the application of cognitive rehabilitation approaches for people with early-stage Alzheimer's disease, and for leading the IDEAL cohort study of people with dementia and carers which focused on what makes it possible to experience a good quality of life with the condition. Linda has published over 350 scientific journal articles as well as translating research findings into practical resources for people living with dementia, family members, professionals and policymakers. Trained as a clinical psychologist and neuropsychologist, she is an NIHR Senior Investigator and a Fellow of the British Psychological Society, Academy of Social Sciences and Gerontological Society of America.

## Ms Catherine Hall

### Chief Executive, Alzheimers New Zealand

Catherine has led Alzheimers New Zealand for more than a decade, as a leading national voice in policy and advocacy. She's positioned the organisation as a thought leader and change agent in the dementia space. She started her career as a registered nurse and has since held senior roles in the public sector and in the non-government sector.

Catherine played a lead role in the development of the original Dementia Mate Wareware Action Plan, pulling together the various threads of the sector. She continued to co-lead the refreshed plan for 2026–2031 which is a roadmap for government action. The plan was presented to the Associate Minister of Health at Alzheimers New Zealand's Summit 2025 alongside friends and partners.

Catherine drives the implementation of the organisation's vision for a future where people living with dementia mate wareware are heard, valued and supported. She's passionate about providing a platform for the lived experience voice and making meaningful change for people living with dementia and their families in New Zealand – from effective policy through to the community.

### Ms Dévora Kestel

**Director,  
Noncommunicable  
Diseases and Mental  
Health, World Health  
Organisation, Switzerland**

Dévora Kestel is a senior mental health policy specialist with more than twenty five years of international experience in Europe, the Caribbean and Latin America, implementing and advising governments on national policies related to mental health systems. She is a strong advocate for the rights of people with mental health issues.

Ms Kestel obtained her MSc in Psychology from the Universidad Nacional de La Plata, in Argentina and her MSc in Public Health at the London School of Hygiene and Tropical Medicine, UK. After completing her university studies in Argentina she worked for 10 years in the development and supervision of community-based mental health services in Trieste, Italy. In 2000 she joined the World Health Organization (WHO) as a mental health officer first in Kosovo and then in Albania where she became the WHO Representative to Albania. In both countries, she worked closely with the Ministries of Health to help establish comprehensive community-based mental health systems.

In 2007 Ms Kestel joined the Pan American Health Organization (PAHO/WHO) as the Sub-regional Mental Health Advisor for the English Speaking Caribbean Countries, based in Barbados. In 2011 Ms. Kestel was appointed to the position of the Regional Mental Health Advisor, at the headquarters in Washington DC, providing technical cooperation in the mental health field to the entire region. In 2015 she became the Unit Chief for Mental Health and Substance Use at PAHO/WHO. Over the years, Ms. Kestel has contributed to and co-authored to publications in the area of mental health.

### Prof Miia Kivipelto

**Professor of Clinical  
Geriatrics at Karolinska  
Institutet (KI), Center  
for Alzheimer Research,  
Sweden**

Miia Kivipelto, MD, PhD, is Professor of Clinical Geriatrics at Karolinska Institutet (KI), Center for Alzheimer Research, and senior geriatrician and Director for Research & Development of Theme Aging at Karolinska University Hospital, Stockholm, Sweden.

Part of her Nordic-UK Brain Network (NBN) multidisciplinary research team (around 100 researchers and clinical staff) is located at University of Eastern Finland and Imperial College London (ICL), UK, where she has part time position as Professor. Her frontline research findings have been published in leading journals 400+ publications, H-index 86) and she has received numerous prestigious national and international awards.

Dr. Kivipelto's translational research focuses on the prevention, early diagnosis and treatment of cognitive impairment, dementia and Alzheimer's disease (AD). Through epidemiological studies, Prof. Kivipelto has identified various lifestyle and vascular risk factors for dementia and interactions with genetic factors and clarified underlying mechanisms. She has developed the first tool for predicting dementia risk based on midlife risk profiles.

This is still one of the few validated risk scores in the field and is in clinical use (including clinical trials). These findings paved the way to the current prevention trials. Professor Kivipelto is the PI of the landmark FINGER Randomized Controlled Trial (RCT) (Finnish Geriatric Intervention Study to Prevent Cognitive Impairment and Disability), which is the first large-scale trial showing that a multi-domain lifestyle-based intervention can reduce the risk of cognitive and functional impairment among at risk persons from general population.

FINGER has caused a paradigm shift, i.e. cognitive decline is no longer an inevitable consequence of aging, but can be prevented with multidomain interventions. This pragmatic model is now tested and adapted worldwide, and Professor Kivipelto has launched the World Wide FINGERS network, a unique interdisciplinary network to share experiences, harmonise data, and plan joint international initiatives for the prevention of cognitive impairment/dementia (45 countries currently involved). She is also founder of the FINGERS Brain Health Institute ([www.fbhi.se](http://www.fbhi.se)) aiming to find novel solutions to promote brain health and prevent cognitive impairment and dementia.

Professor Kivipelto has also contributed to understanding of biological mechanisms underlying dementia/AD and she is actively involved in phase I-III clinical trials and is leading several international consortia. She is often invited to the leading global dementia conferences and task forces, including the G8 Dementia Summit, WHO ministerial meeting in Global actions against dementia and dementia risk reduction guidelines, Neurology and Covid-19 Global Forum, among others.

She has received numerous of prestigious awards, including Forska!Sverige Research Award (2022), Melvin R. Goodes Prize, USA (2021) for excellence in drug discovery (for FINGER concept), the Ryman Prize, New Zealand (2020), Arthur C. Cherkin Award, USA (2019), Swedish Doctoral Union Alzheimer prize (2018), Neuroscientist of the Year (Finland, 2018), MetLife Foundation Major Award for Medical Research (2016), Swedish Alzheimer Research Foundation Major Award (2016), Wajilit and Eric Forsgren's award for dementia researcher (2015), Best PI at KI award (2014) and AXA Research Award (2014), Karolinska Institutet Skandia's Lennart Levi prize (2013), Junior Chamber International Award for Ten Outstanding Young Persons of the World (2011), Academy of Finland Award for Social Impact (2009).

### Prof Gill Livingston

**Professor of psychiatry of older people and consultant psychiatrist, University College London, UK**

Gill Livingston is professor of psychiatry of older people in University College London, Division of Psychiatry, head of mental health care of older people's research & consultant psychiatrist, Camden & Islington NHS FT in the UK.

She led the Lancet International Commission on Dementia Prevention, Intervention and Care, launched in 2017. It contained the first life course analysis of potentially modifiable risks in dementia. She works to the commission's strapline "Acting now on dementia prevention, intervention, and care will vastly improve living and dying for individuals with dementia and their families, and in doing so, will transform the future for society." She also leads the new update to the Lancet standing commission. She will discuss new material from it.

Her other research includes the START project which successfully reduced depression in carers in a randomised controlled trial, demonstrating clinical and cost effectiveness and long term effectiveness. She has also researched interventions in care homes; non-pharmacological interventions for sleep in dementia and dementia and interventions in minority ethnic groups.

### Dr Jorge Llibre-Guerra

**Clinical Core Leader, Dominantly Inherited Alzheimer Network (DIAN) Washington University, USA**

Dr. Jorge Llibre is a behavioral neurologist and global leader in dementia research whose work bridges clinical neuroscience, data science, and health equity. He serves as Clinical Core Leader of the Dominantly Inherited Alzheimer Network (DIAN) at Washington University in St. Louis and Associate Medical Director of the DIAN Trials Unit, where he leads efforts to expand clinical trials and observational studies for autosomal dominant Alzheimer's disease. His research focuses on gene-environment interactions, resilience mechanisms, and the impact of life course risk factors on the onset and progression of Alzheimer's disease. Dr. Llibre's scientific contributions have helped quantify the burden of neurodegenerative diseases in Hispanic and underserved populations, leveraging clinical and biomarker trajectories, exposome data, and harmonized cohort analyses. He leads multiple initiatives across Latin America aimed at advancing genetic counselling, cognitive aging studies, and inclusive data sharing. His work is funded by the NIH, Alzheimer's Association, and the Michael J. Fox Foundation. His recent work focuses on characterizing dementia trends and longitudinal cognitive decline trajectories in Latin America, while also leading a regional SuperAgers initiative to identify protective factors associated with exceptional cognitive resilience in aging populations.

### Prof Jose Luchsinger

**Professor of Medicine and Epidemiology, Columbia University Medical Center, USA**

Jose Alejandro Luchsinger received his MD degree from the Universidad Central de Venezuela in Caracas. He completed an internal medicine residency program including one year as chief medical resident at St. Luke's Hospital in New York City. He also completed a General Medicine Fellowship at Columbia University Irving Medical Center (CUIMC) and obtained an MPH in epidemiology from the Mailman School of Public Health at CUIMC. He has been a faculty member since 1999.

Dr Luchsinger accomplishments include contributing to the early knowledge base relating diabetes, insulin resistance, and vascular risk factors with Alzheimer's disease, being part of the team that first reported an association between the Mediterranean diet and a lower risk of cognitive disorders, conducting a research program examining the effects of metformin on cognitive impairment, and conducting a research program in research on dementia caregiving including the first trial ever comparing two caregiver interventions.

### Dr Facundo Manes

**Professor of Neurology and Cognitive Neuroscience, Favaloro University, Argentina**

Dr. Facundo Manes is a neurologist and neuroscientist with a multidisciplinary career spanning clinical practice, scientific research, institutional leadership, and public policy, with a sustained focus on dementia and brain health across the lifespan. He holds a PhD in Sciences from the University of Cambridge and completed his medical training in Argentina. After developing a clinical and academic career in the United States and the United Kingdom, he returned to Argentina, where he founded the Institute of Cognitive Neurology (INECO) and the INECO Foundation—a non-profit organization dedicated to supporting research programs, training health professionals, and promoting public awareness in brain health—and led the creation of the Institute of Neurosciences at Favaloro University, an interdisciplinary institute integrating neurology, psychiatry, and neurosurgery.

His scientific work has centred on neurodegenerative diseases, particularly dementia, as well as decision-making, social cognition, emotion, and consciousness. He has published more than 250 peer-reviewed scientific articles and has participated in international clinical trials, diagnostic consensus groups, and collaborative research initiatives addressing dementia.

Dr. Manes has held leadership roles in major international scientific organizations, including the Research Group on Aphasia, Dementia and Cognitive Disorders of the World Federation of Neurology and the International Society for Frontotemporal Dementias, contributing to global efforts in dementia research, diagnosis, and awareness. He has served as professor and visiting scholar at universities across Latin America, Europe, North America, and Australia. He is Professor of Neurology and Cognitive Neuroscience at Favaloro University and remains actively involved in clinical care and in the training of clinicians and researchers working in cognitive neurology and dementia.

In parallel, Dr. Manes has served as an Argentine congressman, where he chaired the Committee on Science, Innovation, and Technology of the National Congress. In this role, he has promoted science-informed public policy with particular attention to brain health, aging, and the societal impact of neurodegenerative diseases. His work reflects a long-standing commitment to bridging neuroscience and society, translating scientific evidence into public understanding and policies that improve quality of life for people living with dementia and their communities.

### Dr Soeren Mattke

**Research Professor of Economics & Director of Brain Health Observatory, University of Southern California, USA**

Dr. Soeren Mattke is a Research Professor of Economics at the University of Southern California and the Director of the USC Brain Health Observatory. The Observatory works on health system aspects of brain disorders with a focus on Alzheimer's disease. So far, the Observatory has published analyses of health system preparedness to deliver a disease-modifying Alzheimer's treatment in 14 countries as well as analyses of diagnostic technologies and the economics of those treatments. Dr. Mattke serves on the Editorial Boards of Alzheimer's & Dementia and the Journal of Alzheimer's Disease, on ADI's Medical and Scientific Advisory Panel, the CTAD and CEOi Workgroups on Blood Based Biomarkers and Digital Cognitive Tests and a Consensus Panel for early detection of cognitive impairment in primary care. Dr. Mattke has authored over 200 peer reviewed journal papers and technical reports.

Prior to joining USC, Dr. Mattke was a Senior Scientist at RAND Health, a global think tank, where he led the private sector healthcare practice, and worked at the OECD in Paris on benchmarking healthcare systems in industrialized countries, in the healthcare practice of Bain & Company in Boston, at Abt Associates, a policy consulting firm in Cambridge, MA, and at Harvard University. He trained as an internist and cardiologist at the University of Munich and got his doctoral degree in health policy at Harvard.

## Dr Etuini Ma'u

**Senior Lecturer,  
Department of  
Psychological Medicine,  
University of Auckland,  
New Zealand**

Dr Etu Ma'u is a Senior Lecturer in the Department of Psychological Medicine at the University of Auckland and a Consultant Psychogeriatrician at Te Whatu Ora Waikato. He is a member of the Dementia Mate Wareware Leadership and Advisory group, providing strategic advice to guide government on achieving the vision of the Dementia Matewareware Action Plan in New Zealand. Etu was awarded an HRC Fellowship in 2020, the Alzheimer's New Zealand Fellowship in 2022 and an HRC project grant in 2025 to support his research into Pacific health, dementia risk reduction, and achieving equitable dementia outcomes for Pacific peoples in New Zealand.

## Mr Shin Nomura

**Counselor for Dementia  
Policy Planning, Division  
of Dementia Policy and  
Community-Based Long-  
Term Care Promotion,  
Health and Welfare  
Bureau for the Elderly,  
Ministry of Health, Labour  
and Welfare, Japan**

Shin Nomura joined Japan's Ministry of Health, Labour and Welfare (MHLW) in April 2003. He served in the Health and Welfare Bureau for the Elderly as the official responsible for the practical work of setting reimbursement rates for long-term care services. Subsequently, he engaged in policy discussions on the Community-based Integrated Care System, which later became a core concept of Japan's long-term care insurance system.

In 2010, Mr Nomura was seconded to Kashiwa City Government to move the Community-based Integrated Care System beyond a conceptual framework and promote its implementation at the community level. After returning to the Health Service Bureau at MHLW in 2012, he helped present a future vision for healthcare toward 2035, and the concept of a Regional Symbiotic Society as a model for local communities under population decline.

In 2017, Mr Nomura was seconded to Okayama City Government to facilitate the implementation of these policies. He returned to Medical Affairs Bureau at MHLW

in 2019, where his work focused on medical data integration, regenerative medicine, and responses to the COVID-19 pandemic.

In July 2022, he was seconded to Toyonaka City and appointed Vice Mayor of Toyonaka. In July 2025, he assumed the position of Counselor for Dementia Policy Planning in the Health and Welfare Bureau for the Elderly at MHLW.

## Br John-Richard Pagan

**Dementia Advocate, USA**

Mr. Pagan is an openly gay, Hispanic veteran who was diagnosed with dementia at 47 years old. After meeting with multiple clinicians and facing several misdiagnoses, he ultimately received his Lewy Bodies Dementia (LBD) diagnosis in 2018. Mr. Pagan became a volunteer and advocate for the Lewy Body Dementia Association (LBDA), has been a member of the Dementia Action Alliance Board of Directors and their Advisory Board, serves on the Dementia Friendly Airports Working Group, and serves as an advisor on the Global Dementia Observatory by the World Health Organization (WHO). Mr. Pagan brings a rich set of perspectives, shaped by his life experiences, to any discussion on dementia. His positive approach continues to inspire others with LBD to find a path to 'living well with Lewy Body Dementia'.

## Yakeel T. Quiroz, PhD

**Director, Multicultural  
Alzheimer's Prevention &  
Protection (MAPP) Lab,  
Boston University, USA**

Dr. Quiroz is Professor in the Department of Psychological & Brain Sciences at Boston University, where she leads the Multicultural Alzheimer's Prevention & Protection (MAPP) Lab. She previously served as Associate Professor of Psychiatry at Harvard Medical School and spent over a decade at Massachusetts General Hospital (MGH) directing innovative clinical and research initiatives. Dr. Quiroz earned her MA in cognitive neuroscience and PhD in clinical psychology from Boston University and completed specialized postdoctoral training in neuropsychology and neuroimaging at MGH/Harvard Medical School.

Her research focuses on identifying early cognitive and biological markers of Alzheimer's disease and uncovering mechanisms that support cognitive resilience and delay dementia onset. For over 20 years, she has studied Colombian families with early-onset autosomal dominant Alzheimer's disease (ADAD) caused by mutations in the Presenilin-1 (PSEN1) gene. With near-complete penetrance and symptom onset in the forties, these families offer a rare opportunity to track the biological trajectory of AD from preclinical to clinical stages—and to investigate protective mechanisms in individuals who remain cognitively resilient despite carrying the mutation.

Dr. Quiroz leads multiple NIH-funded studies, including the Colombia-Boston (COLBOS) biomarker study of autosomal-dominant Alzheimer's disease, the Boston Latino Aging Study (BLAST), and the Healthy Aging and Resilient Brain Study on genetic modifiers of cognitive resilience. She is also a Co-Investigator on the Harvard Aging Brain Study (HABS) and the Alzheimer's Clinical Trials Consortium (ACTC).

Dr. Quiroz's work has earned national and international recognition, including the NIH Director's Pioneer Early Independence Award, the International Neuropsychological Society (INS) Early Career Award, and the Alzheimer's Association's Inge Grundke-Iqbal Award for most impactful research.

### Dr Samantha Rukandema

#### Dementia Advocate, Uganda

Samantha is a Dementia advocate in Uganda who acts as a secondary caregiver to her father who is living with Alzheimer's disease.

Through her journey as a carer, she has discovered the urgent need to raise awareness, educate the public, and build empathy for those living with dementia and their families. Feeling almost defeated and isolated, she soon found her open and honest sharing, drew out many from far and wide going through the same situation. She found strength and support from Kenya's dementia association (ADOK) while she was living in Kenya, when her father was diagnosed with Alzheimer's disease. Samantha is also a member of ADI's Global Dementia Expert Panel (GDEP).

Finding minimal support in Uganda she began offering a listening ear and words of encouragement to fellow dementia caregivers which has resulted in the formation of a group called the Dementia caregivers support group of Uganda. The group has grown to such an extent that the need for a formal group of advocates is necessary and overdue.

All is not lost, there is a recognized need to unify all efforts in the 'Dementia/ cognitive decline' arena for the greater good for those living with Dementia and their families in Uganda.

### Prof Mao Saito

#### Professor of Social Sciences, Ritsumeikan University, Japan

Mao Saito is a Professor in the Department of Social Sciences at Ritsumeikan University, where she teaches family sociology and qualitative research methods. Her research focuses on carer support policies and social practices in East Asia, particularly

the intersections of gender and generation, with a focus on male carers and young carers. She is one of the organisers of the National Network of Male Carers and Supporters. Her major publications include *The Sociology of Child and Youth Carers: Creating a Caring Society* (2026, in Japanese) and "Male Carers and Gender-Specific Support in Japan," in *Caring for the Elderly and Dependent People: A Political and Social Issue*, edited by Dolores Comas d'Argemir and Silvia Bofill (2021).

### Prof Philip Scheltens

#### Head of Dementia Fund, EQT Life Sciences, Netherlands

Philip Scheltens is Partner and Head of the Dementia Fund in the EQT Life Sciences team. Philip was Managing Partner at LSP from 2021 until 2022, when LSP joined forces with EQT and was renamed EQT Life Sciences. previously called LSP (Life Sciences Partners).

Prior to joining LSP, Philip worked as a Director of the Alzheimer Center at Amsterdam University Medical Center in Amsterdam, The Netherlands.

Philip is an MD (neurology) and holds a PhD in Medicine from the VU University Amsterdam and is Professor of Neurology at the Amsterdam University Medical Center.

## Ms Christina Scicluna

### CEO, Alzheimer Society of Canada, Canada

Christina Scicluna joined the Alzheimer Society of Canada as Chief Executive Officer in January 2025, bringing nearly 20 years of progressive leadership experience in purpose-driven organizations.

Before joining the ASC, Christina served as Interim CEO of Ronald McDonald House Charities Toronto. A certified Chief of Staff by the Chief of Staff Association and a Master Facilitator, Christina is skilled in collaborative, dialogue-based consultation practices informed by behavioral science. Her expertise in fostering inclusive engagement, earning trust, and driving collective action make her a highly effective leader in complex and rapidly evolving environments.

Christina's leadership is a deeply personal and mission-driven one. Inspired by her grandmother Cesira's journey with dementia and her own mother's role as the primary caregiver, she brings empathy, humanity, and a strong commitment to improving the lives of those impacted by Alzheimer's disease.

## Prof Maw Pin Tan

### Professor in Geriatric Medicine, Faculty of Medicine, University of Malaya, Malaysia

Professor Maw Pin Tan graduated from the University of Nottingham in the UK, where she also received her basic specialist training, before moving up north to Newcastle upon Tyne for her higher specialist training in Geriatric Medicine where she also completed a doctoral thesis on brain blood flow regulation and falls at Newcastle University. She currently heads the Division of Geriatric Medicine at Universiti Malaya and was the Principal Investigator of the AGELESS research programme. Her successes in leading the programme includes Artificial Intelligence Detection Models and a Multimodal Lifestyle Intervention Dementia Prevention as part of the World-wide FINGER network, and data inclusion within the Davos Alzheimer's Collaborative. Prof Tan has published over 300 peer-reviewed articles in Web of Science listed journals. Her advocacy work includes contribution to the eventual completion of the National Dementia Action Plan and the founding president of DAMAI (Dementia Association of MalAysla).

## Mr Benjamin Voisin

### Head of the Social and Medico-Social Policy Department, Deputy to the Director – Directorate-General for Social Cohesion (France)

Mr Voisin graduated from ENA in 2007. He was the Head of the Financial Synthesis Office at the DSS (Social Security Directorate), then Head of the Integration Department at the Seine-Saint-Denis Departmental Council. Benjamin Voisin was financial advisor in Marisol Touraine's office from 2012 to 2013, then Director of the MDPH (Departmental House for Disabled Persons) in Paris until 2016. From 2016 to 2018, he was Deputy Director of Access to Healthcare, Family Benefits, and Occupational Accidents and Diseases at the DSS, before becoming Deputy Director General in charge of the Solidarity Department at the Seine-Saint-Denis Departmental Council, which oversees the Department's policies on children/families, autonomy, social action, and integration.

## Ms Ingrid Wellington

### President, Asociacion de Apoyo a los Familiares de Pacientes con Alzheimer y Otras Enfermedades Demenciales (AFAPADEA), Panama

Ingrid Wellington's a lawyer from Panama, a mom of two, and a huge supporter of people with dementia. She's been the President of Asociacion de Apoyo a los Familiares de Pacientes con Alzheimer y Otras Enfermedades Demenciales (AFAPADEA), an association that helps families dealing with Alzheimer's and other dementias, since 2018. She really thinks that understanding dementia should be like getting a custom-made outfit, it needs to be just right for each person.

Ingrid learned about the Dementia Friends program through ADI's Membership Development Program. She brought it to Panama. She's heading up some cool public campaigns that mix her legal knowledge, advocacy work, and caring nature.

Ingrid loves learning from people with dementia from all over. She calls many of them her friends. She recently went to the International Dementia Conference put on by Dementia India Alliance (DAI) in Bangalore. It gave her a bigger view of things, and she came away with some lasting lessons and new friends. She's leading a

movement that shows that even small countries can get people talking about Alzheimer's around the world.

## Mr Bill Yeates

### **Board Member and Dementia Advocate, Alzheimer's Disease International**

After graduating from Pharmacy, Bill entered the field of education where he was a school administrator and has taught senior Physics and Chemistry for over 35 years.

In August 2019, at the age of 59, he was diagnosed with Younger Onset Alzheimer's Disease. Bill has a keen interest in learning how to best manage his diagnosis on a daily basis and has created his own website where he enjoys helping and showing others who are also living with dementia, how it is possible to still lead a better life. Besides being a volunteer surf lifesaver, Bill competes in masters Swimming, Finswimming, Pool Rescue and Surf Lifesaving Championships, at a local, state, national and international level. This year, Bill travelled to Fiji and participated in his first ever ocean swim.

Currently, Bill is a member of Dementia Australia's Advocate Program and has been Vice Chair of Dementia Alliance International for the past two years. He is also a member of the World Health Organisation GDO KE Focus Group, member of the Global Review Panel for ADI Accreditation of dementia care and a member of the Public Involvement Panel for StepUp. Recently, Bill accepted the position of Living Experience Consultant with Dementia Support Australia.

In the last few years, Bill has started to share his experiences at national and international conferences as a way of raising awareness about dementia, focussing mainly on post diagnostic care and support via his holistic approach to life and the development of reablement plans. His goal here is show by example, that is still possible to live a rewarding and fulfilling life.

## CONFERENCE COMMITTEES

### Local Organising Committee

Mr Benoit Durand

Ms Lorène Gilly

Mr Gérard Herrbach

Mr Joël Jaouen

Ms Léa Milhorne

### Scientific Programme Committee

Prof Henry Brodaty (*Chair, Australia*)

Prof Rhoda Au (*USA*)

Dr Alain Bérard (*France*)

Dr Jennifer Bute (*UK*)

Prof Linda Clare (*UK*)

Prof Jeffrey Cummings (*USA*)

Dr Steven DeKosky (*USA*)

Dr Juan de J Llibre-Rodriguez (*Cuba*)

Dr Temitope Hannah Farombi (*Nigeria*)

Prof Sam Gandy (*USA*)

Prof Yun-Hee Jeon (*Australia*)

Dr Taisei Kinoshita (*Japan*)

Prof Miia Kivipelto (*Sweden*)

Prof Lee-Fay Low (*Australia*)

Dr Jose Luchsinger (*USA*)

Dr Soeren Mattke (*USA*)

Dr Déborah Oliveira (*Chile*)

Ms Meera Pattabiraman (*India*)

Mr Kevin Rabiant (*France*)

Prof Martin Rossor (*UK*)

Dame Louise Robinson (*UK*)

## GENERAL CONFERENCE INFORMATION

### Abstracts

Abstracts are available as a PDF file on the conference website at [www.adiconference.org](http://www.adiconference.org)

### Conference app

An ADI conference app can be downloaded by searching "ADI 2026" on the App Store for iPhone or Google Play for Android. The app enables people to personalise their own programme, see the abstracts, connect with other delegates, and view information about the conference sponsors.

### Catering

Tea, coffee, snacks, and lunch will be provided within the designated catering areas in the Exhibition Hall on Floor -2.

### Certificates of attendance

Personalised, general certificates of attendance can be requested at the registration desk and a printed copy provided to you. If you misplace your certificate, please contact Alzheimer's Disease International (ADI) after the conference at [events@alzint.org](mailto:events@alzint.org)

### Cloakroom

A cloakroom is available at Accueil Bellecour in the registration area on Floor -1.

### Conference badges

The conference badge should be worn at all times in order to gain entry to the session rooms and the exhibition area as allowed by your registration. At the end of the conference, please return your badge and lanyard if you would like these to be recycled.

### Emergencies

In case of an emergency please call the emergency services on 112. If you need to contact the organisers outside of the

registration desk opening hours, please contact Alzheimer's Disease International staff on +44 207 981 0885 or +44 7929 526 285.

### Evaluation

Your feedback is invaluable in helping us develop the conference in future years. The conference evaluation will be issued by email after the conference. We'd really appreciate you taking the time to complete the form and look forward to receiving your feedback.

### Film showings

Selected films from around the globe will be showing in the Salon Tête d'Or on the first floor. The timetable for the films is available in this programme.

### Helpful telephone numbers

For general conference queries please go to the registration desk. If the registration desk is closed, please call Jane Cziborra on +44 207 981 0885 or +44 7929 526285.

### Language guidelines

It is important to ADI that presenters use appropriate language, a few examples are highlighted below and we would encourage all those presenting to look at the language guidelines on the conference website at [www.adiconference.org/abstracts](http://www.adiconference.org/abstracts)

The following points highlight preferred terms next to the terms we advise presenters not to use:

- Dementia/a form or type of dementia/ symptoms of dementia – not Dementing illness, Senile dementia
- Person living with dementia, diagnosed with dementia – not Sufferer, Victim, Demented person, Patient (*unless in a specific medical context*)
- Younger onset dementia – not Early onset dementia

## Photography and filming

An official photographer and videographer will be present during the conference. By participating in this conference, you grant ADI full rights to use the images resulting from the photography/video filming, and any reproductions or adaptations of the images for publicity, press releases, fundraising or other purposes to help achieve ADI's aims.

## Presentations

Presentations should have been uploaded prior to your session. Oral presenters are to bring their PowerPoint presentation to the Speaker Preview Room, located in the Bellecour Accueil on Level -1 (the registration area). Presentations will ideally be provided on a USB stick, although email and Dropbox are also available, although downloads from some platforms will be possible.

## Registration desk

The registration desk is located in Accueil Bellecour on Floor -1. It will be open during the following times:

Date	Open	Close
Monday 13 April	16:00	19:00
Tuesday 14 April	7:00	18:30
Wednesday 15 April	7:00	17:30
Thursday 16 April	7:30	17:00

## Smoking

Smoking is prohibited in the conference venue.

## Tennis and table tennis

The Fédération Française de Tennis and the Fédération Française de Tennis de Table will be organising table tennis and tennis sessions near the exhibition hall. Tennis sessions will take place on Tuesday April 14, and table tennis on Thursday April 16. State-certified professional instructors trained in Tennis for Health and in the care of people living with Alzheimer's will be present.

The Speaker Preview Room is open at the following times:

Date	Open	Close
Monday 13 April	14:00	19:00
Tuesday 14 April	7:00	19:00
Wednesday 15 April	7:00	19:00
Thursday 16 April	7:00	17:00

If there is an issue, please raise this well in advance of your session, by contacting [events@alzint.org](mailto:events@alzint.org) or speaking to one of the AV team in the speaker preview room.

## Programme changes

The organiser reserves the right to make changes if necessary. No full or partial refunds will be made to the attendees in the event of cancellation or other changes in the programme.

## Volunteers

Volunteers are wearing red conference branded t-shirts. If you need assistance, please let us know.

## Welcome reception

An in-person welcome reception, sponsored by the Fondation Médéric Alzheimer, will be held on the first day of the conference (April 14), starting at 17:45 in the Exhibition space.

## WiFi

Complimentary WiFi can be accessed throughout the session rooms and Exhibit Hall on all conference days. The WiFi network is called Network ADI\_2026 and password is ADI\_2026.

**WE'LL NEVER  
STOP LOOKING FOR  
ANSWERS  
FOR PATIENTS  
WHO NEED THEM.**

*Lilly*

**A MEDICINE COMPANY**

# What matters to them, matters the most to us

Families impacted by complex neurological disorders and rare diseases have few or no treatment options. This challenge sparks our commitment to redefine care. United by vision and scientific excellence, we deliver solutions that make the difference for those who need them most.

Learn more about our therapies that make the difference at [Acadia.com](https://Acadia.com)

## SPONSORED SYMPOSIA: TUESDAY 14 APRIL

The conference sponsors can be found in the acknowledgements section of this programme.

**Tuesday 14 April 7:45–8:45,  
Gratte Ciel 1,2,3**

### Implementation of multidomain interventions for dementia risk reduction: experiences from World-Wide FINGERS

Risk reduction and prevention of cognitive impairment and dementia has been highlighted as crucial to curb the expected rise of cases. The World-Wide FINGERS (WW-FINGERS) global network of multidomain intervention trials for dementia risk reduction (70+ countries, 50+ studies) is leading international efforts to identify effective and sustainable strategies that simultaneously address multiple risk factors for cognitive decline and dementia.

This work builds on the landmark Finnish Geriatric Intervention Study to Prevent Cognitive Impairment and Disability (FINGER), which outlined a successful multidomain intervention paradigm, reporting cognitive and additional health benefits in older adults at increased risk for dementia via a combination of healthy diet, physical activity, cognitive and social stimulation, and monitoring of cardiometabolic disorders. Successful global adaptation and enhancement of this model in different populations and settings include the U.S. Study to Protect Brain Health Through Lifestyle Intervention to Reduce Risk (U.S. POINTER), the Japan-Multimodal Intervention Trial for Prevention of Dementia (J-MINT), the Malaysian Multidomain Intervention for the Reversal of Cognitive Frailty Using a Personalized Approach (AGELESS Trial). Positive results from these trials have paved the way for implementation activities, aiming to translate the evidence into practice in both communities and clinical settings, thus bringing evidence-based dementia risk reduction strategies closer to the community.

This symposium will provide an up-to-date overview of the implementation work done in these countries (Nordics, USA, Japan, Malaysia), reflecting on barriers and facilitators, results and lessons learned, which can facilitate wider implementation across the whole WW-FINGERS network, and maximize public health benefits.

#### Co-chairs:

**Prof. Miia Kivipelto**, Professor of Clinical Geriatrics, Karolinska Institutet, Sweden

**Dr Joanne Pike**, President & CEO Alzheimer's Association, USA

#### Speakers:

**Prof. Jenni Kulmala**, Professor of Gerontology, Tampere University, Finland

**Prof. Takashi Sakurai**, National Center for Geriatrics and Gerontology, Japan

**Dr Joanne Pike**, President & CEO Alzheimer's Association, USA

**Prof. Suzana Shahar**, Dean of Faculty of Health Sciences, University Kebangsaan, Malaysia

**Tuesday 14 April 7:45–8:45,  
Salon Gratte Ciel**

### Longitude Prize on Dementia Highlights

In partnership with Challenge Works, the Alzheimer's Society will lead a breakfast symposium to highlight the success of the Longitude Prize on Dementia. The £4.4 million international prize was established to drive the development of personalised, technology-based tools co-created with people living with early-stage dementia to help them maintain their independence. This panel has been formed to celebrate the groundbreaking work of innovators across the globe who have been Longitude Prize finalists and winners over the last four years.

#### Chair:

**Ms Fiona Carragher**, Chief Policy and Research Officer, Alzheimer's Society, UK

#### Speakers:

**Ms Fiona Carragher**, Chief Policy and Research Officer, Alzheimer's Society, UK

**Prof. Dawn Brooker**, University of Worcester, Longitude Prize on Dementia Judge, UK

**Mr Trevor Salomon**, Chair of the Lived Experience Advisory Panel (LEAP), UK

#### Longitude Prize on Dementia Winner and Finalists

**Ms Caroline Purslow**, Head of Health, Challenge Works, UK

# Seeking treatment for Alzheimer's

# Restoring hope for families

For decades, we have been committed to advancing research in Alzheimer's disease on behalf of patients and families. Today, through a precision-based, multi-faceted approach, we are deepening our understanding of the disease's complexity and advancing research across its full continuum. Guided by science and driven by patients, we are working to preserve what matters most: memories, independence, and hope for the next generation.

# MAKING BREAKTHROUGHS HAPPEN

## SPONSORED SYMPOSIA: WEDNESDAY 15 APRIL

**Wednesday 15 April 7:45–8:45,  
Gratte Ciel 1, 2, 3**

### Every day counts: How national dementia strategies can improve health care for patients with early Alzheimer's disease

In 2025, Sweden launched a new national dementia strategy, "Every day counts," with a clear ambition to broaden the scope of the strategy to include all phases of Alzheimer's disease – from diagnosis to dementia, including preventive measures – because dementia is not to be seen as part of natural aging.

Nordic countries are currently reviewing their national strategies, and the extension of WHO's Global Action Plan is creating recommendations for early intervention. Health economic perspectives also need to adjust to reflect expected societal and patient gains.

This seminar aims to discuss the need for national strategies to focus on people in the early phases of Alzheimer's disease; the most important components in a strategy to improve health care for patients with early Alzheimer's disease; the value of diagnostics and interventions in early Alzheimer's disease; and how can these learnings be used to drive change with the patient in focus.

#### Chair:

**Mr Chris Lynch**, Deputy CEO and Director of Policy and Communications, ADI, UK

#### Speakers:

**Prof. Miia Kivipelto**, Professor of Clinical Geriatrics at Karolinska Institutet, Sweden. Chair of MSAP (Medical and Scientific Advisory Panel) ADI

**Prof. Linus Jönsson**, Professor of Health Economics, Karolinska Institutet, Sweden

**Ms Marianne Mørck Danielsen**, patient advocate, Norway

**Wednesday 15 April 7:45–8:45  
Salon Gratte Ciel**

### Unseen, under-researched: unheard voices of younger-onset dementia

The sons, daughters, children, and allies of younger-onset dementia (YOD) join as part of NEXTGEN at Lorenzo's House, turning their lived experience into a global movement for dementia justice.

#### Chair:

**Ms Paola Barbarino**, ADI CEO

#### Speakers:

**Ms Ella Atkins**, UK

**Mr Longwe Grant**, Zambia

**Ms Ila Gutfreund**, El Salvador

**Mr Walt Dawson**, USA

**Ms Seada Kassie**, UAE

**Ms Paige Censale**, USA

**Wednesday 15 April 13:00–14:00,  
Salon Gratte Ciel**

### From gaps to action: reshaping Alzheimer's policy with the AD Atlas. As science opens the door to earlier diagnosis and disease-modifying approaches in Alzheimer's disease, will your country's policies keep pace – or fall behind?

Despite the growing global burden of dementia – over 55 million people worldwide – and emerging options to intervene earlier in the Alzheimer's continuum, many health systems remain oriented towards late-stage care. Underdiagnosis and fragmented pathways continue to limit the impact of national dementia plans. In high-income countries, only 20 to 50% of dementia cases are recognised and documented, meaning many people receive no diagnosis at all.

Closing these gaps is a policy challenge. Using the newly launched Alzheimer's Disease Atlas as a practical tool, this session will show how comparative country data can inform policy dialogue, prioritisation, and resource allocation.

A moderated, talk show-style panel with experts from three regions will then highlight policy successes that have improved diagnosis, access, or care; critical gaps that persist despite existing strategies; and concrete tactics used to secure change.

The symposium will also feature "TODAY – A Reverse Story for Alzheimer's," a live performance tracing a person's journey with Alzheimer's disease in reverse, from loss back to early recognition and support.

#### Chair:

**Dr Ishtar Govia**, Founder & CEO Amagi Health Ltd, Sweden

#### Speakers:

**Ms Paola Barbarino**, CEO, Alzheimer's Disease International, UK

**Dr. Norberto Anizio Ferreira Frota**, ABRAZ Scientific Director, Brazil

## SPONSORED SYMPOSIA: WEDNESDAY 15 APRIL

**Mr Nobuyuki Kii**, Principal/Head, Senior Society Innovation Group, Research & Consulting Division, Japan

**Ms Lorène Gilly**, France Alzheimer, Head of the Public Affairs Department, France

**Wednesday 15 April 17:15–18:15,  
Salon Gratte Ciel**

### Advancing precision medicine through biomarker innovation

Advances in biomarkers and diagnostics are rapidly reshaping the Alzheimer's disease landscape, yet a significant global unmet need remains for tools that

Alzheimer's  
Drug Discovery  
Foundation

are non-invasive, scalable, and affordable across diverse healthcare settings. Framed within the goal of advancing precision medicine, this panel will provide an overview of emerging innovations, including digital, AI-enabled, speech-based, ocular, and blood biomarkers, that aim to expand access to earlier detection, enable prevention strategies, and address critical gaps in current biomarker contexts of use. Bringing together experts in the field, panellists will explore how these approaches will help advance next-generation therapeutics, while also helping to reduce clinical testing bottlenecks, streamline clinical decision-making, and broaden diagnostic accessibility in real-world practice. Together, multimodal biomarker innovation offers the potential to accelerate precision medicine and support more equitable, globally adaptable care pathways.

#### Chair:

**Dr Laura Nisenbaum**, Executive Director of Drug Development, Alzheimer's Drug Discovery Foundation, USA

#### Speakers:

**Dr Betty Tijms**, Associate Professor of Neurology at Amsterdam University Medical Center, The Netherlands

**Dr Rachid Riad**, Co-Founder, Chief Technology Officer and Chief Science Officer at Callyope, France

**Prof Miia Kivipelto**, Professor in Clinical Geriatrics at Karolinska Institutet, Center for Alzheimer Research and Senior Geriatrician and Director for Research & Development of Theme Aging at Karolinska University Hospital, Sweden

**Stephan Meylan**, AI and Machine Learning Consultant, ADDF, The Netherlands

**Prof Charlotte Teunissen**, Professor in Neurochemistry at Amsterdam, UMC, The Netherlands

## SPONSORED SYMPOSIA: THURSDAY 16 APRIL

**Thursday 16 April 7:45–8:45,  
Gratte Ciel 1,2,3**

### Scalable dementia solutions in LMICs: integration of economics, primary care and technology for improved policy and practice

This symposium will explore integrated strategies linking health policy, primary care strengthening, health economics, and technological innovation to improve dementia outcomes. Topics will include the design and implementation of national dementia plans in LMICs, economic considerations in dementia care and support, integrating dementia care into primary health systems, and the potential and limitations of technology-enabled tools to support diagnosis, monitoring, and caregiver support.

#### Chairs:

**Dr Christopher Butler**, PI - IMPACT Salud, Imperial College London, UK

**Mr Diego Aguilar**, Regional Director, Americas, Alzheimer's Disease International, Argentina

#### Speakers:

**Ms María Kathia (Maki) Cárdenas**, University of Oxford (UK)

**Ms Anne Cumming**, Independent Advisor, Australia

**Dr Sofia Cuba**, IMPACT Salud, Peru

**Thursday 16 April 7:45–8:45,  
Salon Gratte Ciel**

### Early detection of Alzheimer's disease: perspectives on policy and practice

This session aims to stimulate dialogue on dementia diagnostic innovations by integrating research and practice perspectives with policy insights to improve real-world adoption and implementation of these tools.

Funded by the Innovative Health Initiative (IHI), the AD-RIDDLE project addresses critical challenges in the management of Alzheimer's disease by developing a modular toolbox platform that will enable healthcare systems to mix, match, and tailor components to their unique needs and settings. This session brings together research, practice and policy perspectives on dementia diagnostic innovation and prevention.

#### Chair:

**Mr Niranjana Bose**, Executive Director, Alzheimer's Disease Data Initiative, USA

#### Speakers:

**Prof. Miia Kivipelto**, Research Director, Karolinska Institutet, Sweden

**Dr Lukas Duffner**, Project Officer, Alzheimer Europe, Luxembourg

**Dr Ties Hoomans**, Davos Alzheimer's Collaborative (DAC), UK

#### Video with members of the AD-RIDDLE Advisory Board

Bellecour 3**

### Early career researcher workshop: presentation skills training (by invitation only)

A maximum of 30 delegates who are at an early stage of their research careers (including but not limited to PhD and postgraduate students) will be invited to an interactive workshop which welcomes input and questions from the participants and features guiding principles, "tips and techniques," as well as reviews highlights of the conference itself and identifies the best presenters. Participants will leave with an increased awareness of the vital role presentation skills play in communicating their research and in particular, the importance of keeping in mind that the "end user" if often going to be the person with dementia.

#### Co-chairs:

**Mr Lewis Arthurton**, Head of Policy and Communications, Alzheimer's Disease International, UK

**Dr Patricia Saletti**, Research Partnerships Coordinator, Alzheimer's Disease International

#### Speakers:

**Ms Christine Tabuena**, Fondation Médéric Alzheimer, France

**Ms Carolyn Paul**, Edelman, United Kingdom

**Mr Shaun Beedle**, Edelman, United Kingdom

**Ms Natalie Ive**, Australia

 Bristol Myers Squibb®

# Elevating care standards

## PRODUCT SHOWCASE

**Tuesday 14 April 12:45-13:15 Bellecour 3**

### Tolion Brain Coach: AI-powered guidance for dementia prevention

The preclinical phase of Alzheimer's disease (AD) precedes clinical symptoms by decades, offering a critical window for preventive intervention. Up to 45% of dementia cases are attributable to modifiable risk factors, yet scalable tools for individualized, evidence-based prevention remain limited. Tolion Health AI developed the Tolion Brain Coach, a digital platform supporting individuals at increased dementia risk through personalized, science-driven brain health guidance.

The platform integrates multimodal individual-level data, including structured questionnaires, AI-supported conversational input, medical records, and blood-based biomarkers. It computes an individualized Brain Age Score reflecting cumulative risk across modifiable and non-modifiable factors.

Using predictive modeling trained on heterogeneous datasets (accounting for sex, age, race/ethnicity, comorbidities, and medication use), the system generates tailored recommendations and simulates long-term outcomes under different intervention scenarios. Case-based modeling highlights substantial inter-individual variability, underscoring the limitations of one-size-fits-all prevention. AI-supported personalization offers a scalable strategy for translating multidimensional risk profiles into individualized preventive guidance, complementing existing dementia prevention approaches during the preclinical phase of AD.

#### Presenters:

**Dr Kateřina Veverová**, Vice President of Medical Affairs, Tolion Health AI, Czechia

**Dr Julie Novakova Martinkova**, Tolion Health AI, Czechia

**Wednesday 15 April  
13:00–13:30, Bellecour 3**

### Digital MoCA tools for assessing cognition

During the product showcase session, Dr Murray Gillies, VP of Science and Innovation at MoCA Cognition will go through the various digital tools from MoCA and show several examples of where they can be applied. These tools include:

- **Xpresso**: A rapid, self-administered tool, which assesses the probability of scoring above or below the MCI cut-off on the paper MoCA test. The Xpresso has been completed by more than 100,000 individuals, enabling quantification of dependencies on demographics, platform and number of times performed.
- **Solo**: The digital variant of the gold standard paper test. Administered by avatar-generated videos and scored by AI algorithms. The Solo has been used to collect training data of more than 1,000 participants, allowing for high performance algorithms and comparison between paper and digital.
- **CHAI**: The Cognitive Health Assessment Index questionnaire, based on the Lancet modifiable risk factors, helps characterize whether people are living a healthy lifestyle in terms of their brain health. More than 10,000 people have performed the questionnaire and also measured their cognition with Xpresso. This allows investigations between the two modalities
- **Data Platform**: All MoCA digital tools are connected to the MoCA data platform for centralized reporting and analysis. This allows multimodality neuroinformatics and deep characterization of people's neurological health.

#### Presenter:

**Dr Murray Gillies**, VP of Science and Innovation, MoCA Cognition, The Netherlands

## Oral Health in Dementia Care Matters

Supporting caregivers. Protecting dignity.  
Improving wellbeing.

### About Us

At **Oral Care Innovations**, our mission is to improve oral health care standards while protecting **patient safety, dignity, and wellbeing**.

Founded in North Wales in 2016, we work closely with healthcare professionals, care providers, and caregivers to develop practical oral care solutions that support safe and effective hygiene practices in clinical, hospital, and home care settings.

Oral health is often overlooked in vulnerable patient groups, yet poor oral care can lead to significant complications including infection, discomfort, and reduced quality of life. Our work focuses on helping care teams deliver safe, consistent oral care that supports overall health and patient comfort.

Through collaboration with frontline healthcare staff, we continue to innovate and improve oral care approaches designed specifically for the challenges faced in modern healthcare environments.

### Why Oral Care Matters

- ✓ Reduces infection risk
- ✓ Supports nutrition and hydration
- ✓ Improves comfort and dignity
- ✓ Contributes to safer patient care

## INFORMATION FOR PEOPLE LIVING WITH DEMENTIA

### Quiet room for people with dementia

The Tête d’Or 2 room on the first floor is the quiet room for people living with dementia and their support partners or carers. It is a space to relax, meet new friends and take time out from the busy conference. The room will be open at the times below and will serve tea and coffee throughout the day, with light refreshments during the breaks.

Date	Open	Close
Monday 13 April (pre-conference)	16:00	18:00
Tuesday 14 April	7:30	17:30

## TRAVEL AND LOCAL INFORMATION

### Things to do

Lyon, France's third biggest city and the capital of the country's Auvergne-Rhône-Alpes region, is a stunning historic town nestled in the junction of the Rhône and Saône rivers. More information about Lyon can be found on their tourism board website: <https://en.visiterlyon.com>

### Parking

There are three carparks less than three minutes away by foot from the Convention Centre.

- P0 – 1,000 places, max height: 1.90m
- P1 – 1,150 places, max height: 1.90m
- P2 – 1,200 places, max height: 2.70m

### Public transport

The Convention Centre is serviced by several buses from the centre of Lyon:

- C1 from the train station Lyon Part Dieu – Stop Cité internationale | Centre de Congrès
- C2 from the train station Lyon Part Dieu – Stop Cité internationale | Transbordeur
- C5 from the métro station Jean Macé – Stop Cité internationale | Centre de Congrès
- C23 from Flachat Alain Gilles – Stop Cité internationale | Centre de Congrès
- C26 from the métro station Grange Blanche – Stop Cité internationale | Transbordeur
- Bus 70 from the train station Lyon Part Dieu – Stop Cité internationale | Transbordeur

### Money

The currency used in France is the euro (€). Lyon has numerous bureaux de change. Most credit and debit cards are widely accepted in restaurants, bars, cafes, and shops in France. Contactless payment cards are also widely used, and many businesses accept them. Payments using non-French bank cards may incur an overseas transaction fee. Fees vary by card and by bank, so check with your card issuer before tapping your contactless card in Lyon.

### Taxis

There are two zones for taxi drop-offs at the Convention Centre.

- Zone 1: The main entrance at the foot of the bear statue
- Zone 2: The Amphitheatre

For the ADI conference, please use the Amphitheatre drop off.

### Telephone

The international dialling code for France is +33.

# Advancing Oral Investigational Approaches in Alzheimer's Disease Focused on Upstream Biology. Inspired by Patients.

Alzheimer's disease begins long before symptoms appear. At Anavex, we are investigating upstream biological pathways associated with disease progression, with the goal of addressing underlying mechanisms of the disease.

Every day with Alzheimer's matters. Our research is designed to deepen scientific understanding and explore approaches that may have meaningful relevance for patients, caregivers, and the families who support them.

We are committed to advancing investigational therapies with a focus on accessibility, scalability, and integration within real-world healthcare systems.

## Visit us at Tabletop T3

[www.anavex.com](http://www.anavex.com)

Take action to prevent, slow down the progression, and improve quality of life for those living with dementia

**OUR VISION** The challenges of cognitive ageing can be overcome by providing adapted, respectful support for people living with dementia and their carers, raising awareness in society and encouraging individual and collective behaviour that promotes cognitive health.

**3 CHALLENGES** Prevention, Psychosocial interventions and Housing.

**THE ALZHEIMER'S OBSERVATORY** The Alzheimer's Observatory is responsible for the evaluation of the quality of care provided to people living with dementia, their relatives and professionals working within the senior care sector.

## PSYCHOSOCIAL INTERVENTIONS AND DEMENTIA

Psychosocial interventions are key tools for improving cognitive, psychological, social, and physical functioning and, more broadly, the quality of life of people living with Alzheimer's disease or a related disorder. They also aim to improve the quality of life of family caregivers.

SCAN THE QR CODE TO DISCOVER THE 10 MAIN PSYCHOSOCIAL INTERVENTIONS

## ALZHEIMER'S CO-HOUSING: A THIRD WAY?

Discover the results of our study on Alzheimer's co-housing, an inclusive housing solution that supports people until the end of their lives, in order to better understand their operation, the role of families, characterize the necessary staff, and the economic model. And to take this initiative further, we have created a European working group on this approach. Join us!
