

World Alzheimer Report 2015 – Corrections

Some errors made it into the originally distributed version of the World Alzheimer Report 2015.

The corrections are noted below, and appear in the updated PDF download (which can be identified by a note on corrections on the inside front cover).

- On page 9, one axis of Figure 1.2 was incorrect.
- On page 25, the second paragraph contained incorrect numbers (the numbers in the table and elsewhere in the text were correct).
- On page 53, there was a reference marked (22), which was intended to refer to a different article (missing from the reference list).
- On page 65, the points on the graph (Figure 6.1) were incorrectly placed.

A number of other formatting improvements and inconsequential text corrections were also made.

The updated report can be found at <https://www.alzint.org/worldreport2015>
